To Whom It May Concern:

It is my pleasure to write this letter of recommendation for Michael O'Brien. He was a student in my precalculus class for the fall 2005 semester. I found him to be an extremely intelligent individual with a hardworking personality.

Michael earned an A on every test he was given in my course. In fact, on two of the four tests he scored a perfect 100. He was at the top of the class, earning a 98 average for the entire course. I would say that he was one of the most intelligent students I have had during my fourteen years of teaching.

I believe Michael will contribute much to the physical therapy profession. He holds himself to a high standard, and he also has a natural quest for knowledge. I see him as someone who will continually update his coursework to remain current on the newest innovations. This will benefit not only the physical therapy community but his patients as well.

It is with great enthusiasm that I recommend Michael for the physical therapy program. If you need to contact me, please feel free to do so at (386) 785-2033.

Sincerely,

**Kimberly Muterspaugh
Associate Professor of Mathematics
