To Whom It May Concern

I am very pleased to write this letter of recommendation for Michael O'Brien who is applying to your Program. Michael was a student of mine in Anatomy and Physiology I and II several years ago. Through his diligence and hard work he earned excellent grades for the courses.

At all times Michael proved himself to be a responsible and dedicated student. He was always prepared for class and took an active interest in the subject, learning for the sake of learning and not just someone who memorizes detail for a test. Michael is also a truly pleasant person who worked well with me and his fellow classmates. He is an intelligent and mature individual whose integrity is beyond reproach.

I believe Michael O'Brien to be extremely capable and deserving. His ease with people and integrity prove to me that he would make an excellent student. I give him my highest recommendation.

Sincerely,

Susan T. Pate
Senior Professor, Chair
DBC Science Department
